

SHUBHAM DUDHAL

Product Manager — Agentic AI & SaaS Platforms

New Delhi, India | +91-9850156959 | svdudhal777@gmail.com | linkedin.com/in/shubham-dudhal-41bb61192

SKILLS

Product Management & AI: Agentic AI Workflows, Autonomous Agents, Product Lifecycle Management (PDLC), PRD & BRD Documentation, Product Discovery & Validation, User Stories & Acceptance Criteria, Product Analytics & Data-Driven Insights, Backlog Prioritization, A/B Testing, Wireframing & Prototyping, Stakeholder Management, User Empathy Mapping

Technical & Platforms: Generative AI, Large Language Models (LLMs), Model Context Protocol (MCP), Function Calling, Prompt Engineering & Evaluation, APIs & Webhooks, Jira, Notion, Postman, Figma, ClickUp, Miro, Git, UX Research

EDUCATION

Mulund College of Commerce, University of Mumbai

Bachelor of Science in Computer Science (B.Sc. CS) — CGPA: 8.81 / 10

Mumbai, India

2020 – 2023

Maharashtra State Board of Secondary and Higher Secondary Education

Higher Secondary Certificate (HSC), Science — Second Class B

Thane, India

2018 – 2019

EXPERIENCE

Roadcast

New Delhi, India

Project Manager (Product Scope)

Dec 2025 – Present

- Designed live telemetry data retrieval workflows using Model Context Protocol (MCP) and Redis tool-calling, enabling autonomous operational Q&A and natural-language fleet querying on the Native AI Dashboard.
- Architected automated driver intervention workflows integrating voice AI models (LiveKit, Sarvam) with AI guardrails and deterministic state machines, qualifying safety events to trigger automated escalation calls.
- Authored PRDs and system specifications for Dynamic Forms 2.0 with AI-assisted form generation, standardizing vehicle inspection capture across backend microservices and the Angular web application.
- Formulated unified route and halt-point synchronization logic across TripHub and Fuel Monitoring System (FMS), eliminating route-target race conditions and unifying multi-stop operational workflows.
- Directed bi-weekly sprint planning, backlog grooming, and cross-functional engineering execution via Jira, establishing implementation-ready technical acceptance criteria and rollout gates across Go and Angular codebases.

CultureX

Ahmedabad, India

Associate Product Manager

Mar 2025 – Aug 2025

- Instituted Agile Scrum framework and led sprint rituals using Jira and Notion, improving team delivery throughput by 25% within two sprints.
- Developed Strategizers.ai chatbot integrating OpenAI APIs with Instagram account data, delivering automated personalized marketing strategy suggestions and engagement insights based on user queries.
- Authored PRDs and roadmap milestones for strategic SaaS modules including Auto-Report Generation, Platform Guide, and Facebook Integration, aligning engineering deliverables with business roadmaps.
- Automated sprint templates, release notes, and post-sprint reporting via Notion and Jira, establishing delivery transparency across engineering and executive leadership.
- Translated executive and client requirements into engineering user stories with acceptance criteria, streamlining feature handoffs across design, development, and QA.
- Synthesized user feedback loops from client demonstrations into prioritized backlog iterations, resolving core usability and engagement bottlenecks.

EXPERIENCE (CONTINUED)

Mummy Ki Rasoi

Thane, India

Founding Member

Jan 2020 – Jan 2021

- Launched a multi-platform cloud kitchen on Swiggy and Zomato, scaling order volume from 5 to 80 orders per day within 60 days.
- Standardized food preparation and packaging workflows through operational SOPs, reducing customer order turnaround time and menu SKU complexity.
- Renegotiated aggregator commission structures from 31% down to 26% and optimized delivery search rankings by aligning kitchen prep times and ratings with platform algorithms.
- Deployed targeted local digital campaigns and radius-targeted print media, accelerating customer acquisition across the operating territory.
- Managed unit economics and instituted order-level customer feedback loops, boosting repeat customer retention rate and platform NPS.

INTERNSHIPS

Fynd

Mumbai, India

Product Management Intern

Aug 2024 – Nov 2024

- Orchestrated Catalogue Cloud onboarding for Netmeds by establishing data triaging workflows, reducing data flow error rates during initial enterprise rollout.
- Structured variant mapping, data validation, and error detection schemas, enabling production onboarding of 3 enterprise clients including JioMart and Milkbasket.
- Generated QA test cases, feature specifications, and sprint documentation using GenAI tools, cutting testing cycle times by 30%.
- Executed Root Cause Analyses (RCAs) and cross-functional alignment sessions across QA and backend teams, stabilizing Catalogue Cloud for production deployment.
- Formulated functional requirements for 4 upcoming backend services (UCP, SX, RUI, SS), establishing data flow schemas across interconnected systems.

Edgistify

Thane, India

Product & Tech Intern

Jun 2019 – May 2020

- Guided the launch of the Android DAQ warehouse application by translating operational field requirements into technical specifications, transitioning from developer to product lead.
- Engineered offline-first data caching and auto-sync architecture using local storage schemas, maintaining field data capture during low-connectivity warehouse audits.
- Implemented targeted logistics keyword strategies and directory indexing protocols, increasing inbound organic search visibility.
- Facilitated cross-functional alignment across development, design, and SEO teams in Scrum rituals, maintaining bi-weekly delivery momentum.

PROJECTS

Strategizers.ai – Generative AI Marketing Copilot

Ahmedabad, India

- Engineered an automated marketing advisory chatbot leveraging OpenAI LLMs and Instagram account data, generating personalized audience growth strategies and engagement analytics.

DAQ (Data Acquisition App) – Offline-First Logistics Platform

Thane, India

- Spearheaded product requirements and offline-first auto-sync architecture for an Android field app, ensuring uninterrupted warehouse location auditing in zero-connectivity zones.
